4. Karl Marx
   - Communism
   - Population problem was due to inequality

Population Policies
1. Pro-natalist (expensive)
   a) Tax breaks for families
2. Anti-natalist (restrictive)
   a) Tax breaks for sterilization
   b) China’s Two child policy

5. Epidemiologic Transition Model
   * Focuses on how people are dying in each stage of the DTM.
   A. Epidemic vs Pandemic
      1. Epidemic - disease affecting a local region
      2. Pandemic - "a lot of people globally"

B. Stages in ETM
1. Stage 1
   - famine, drought, pandemics
   - horrible

2. Stage 2
   - Age of Receding Pandemics
   - Diseases related to over-crowding
3. Stage 3
   - Degenerative Diseases - Men, Male
   - Heart Attack, High Cholesterol, Cancer
4. Stage IV
   - Delayed Degenerative Disease
     MS, ALS
   - Re-emergence of infectious disease.
